codespeed

Front End Developer

As a Front End Developer at Codespeed, you'll collaborate on a variety of fun and interesting projects. Besides a paycheck, you'll gain experience in a spectrum of the latest development technologies. You'll benefit from the personal satisfaction of contributing in a team effort to create cool things while working with cool people and great clients. You'll also get to live and play in the most amazing place there is to live and play . . . Spokane, Washington.

Here's what we're looking for:

- Fundamental programming competence with a firm grasp on object-oriented programming practices, debugging and testing

- Ability to write clean, intelligible code and adhere to team coding conventions

- Experience with AGILE / SCRUM work flow and version control

- Experience with HTML, CSS, JavaScript and/or Java, Objective-C, Swift, C++, C

- Experience working in a team project environment and ability to communicate clearly and effectively

- Ability to understand technical documentation to ensure proper usage of third party libraries and components where code examples are not available

- Excellent time management skills and the ability to stay focused on tasks

- Desire to learn and improve your skills

- Also desirable: Node experience, ES6, web frameworks (Angular, Vue, React, Ember, Backbone, etc.), task runners and build systems, SASS/LESS, templating languages (Jade, Twig, Handlebars), web server setup and management, Linux, database design, open source contributions

To be considered for an interview, please submit your resume and a cover letter in confidence to **jobs@codespeed.com**. Use "Front End Developer" in the subject line.
